16. Abstract This report is Interim Report Volume 4 for the Cost and Operational Effectiveness Analysis for Ice Patrol Mission Analysis Study. The report examines the cost reimbursement procedures for IIP. The Department of State manages the International Ice Patrol cost reimbursement program using proportionate cost shares for each government that has accepted the financing Agreement. Costs are charged to the home state of the vessels benefiting from the Ice Patrol Service. In 1992, the total United States Coast Guard cost of conducting the International Ice Patrol was \$3,318,800. The United States share was \$454,791. At present, a total of 19 governments that comprise about 53% of the total tonnage shipped through the Ice Patrol area are signatories to the financing Agreement. Although the payment record is somewhat mixed, recent data (1985-1989) indicate that 90-95% of the billed costs should be recovered by the United States Treasury. Actual recovery has been less, depending on the year and political circumstances. The 19 signatory nations comprise about 53% of the total benefiting tonnage. Thirteen additional countries that are non-participating, with over 1,000,000 GRT of tonnage each, could significantly reduce the individual country cost shares if they would provide financial support for the International Ice Patrol.

COST REIMBURSEMENT FOR USCG INTERNATIONAL ICE PATROL ACTIVITIES

ABSTRACT

The Department of State manages the International Ice Patrol cost reimbursement program using proportionate cost shares for each government that has accepted the financing Agreement. Costs are charged to the home state of the vessels benefiting from the Ice Patrol Service. In 1992, the total United States Coast Guard cost of conducting the International Ice Patrol was \$3, 318,800. The United States share was \$454,791. At present, a total of 19 governments that comprise about 53% of the total tonnage shipped through the Ice Patrol area are signatories to the financing Agreement. Although the payment record is somewhat mixed, recent data (1985-1989) indicate that 90-95% of the billed costs should be recovered by the United States Treasury. Actual recovery has been less, depending on the year and political circumstances. The 19 signatory nations comprise about 53% of the total benefiting tonnage. Thirteen additional countries that are non-participating, with over 1,000,000 GRT of tonnage each, could significantly reduce the individual country cost shares if they would provide financial support for the International Ice Patrol.

INTRODUCTION

Objective.

The purpose of this report is to review the authority and procedures for identifying and collecting reimbursement for the United States cost of conducting the International Ice Patrol from those countries whose shipping benefits from the International Ice Patrol service. In addition, the report includes an evaluation of the success of the reimbursement program and the degree to which the actual International Ice Patrol costs are recovered.

Legal Background.

The signing of the International Convention for the Safety of Life at Sea in 1914 officially established the International Service of Ice Observation and Ice Patrol. The current authority for this service is the International Convention for the Safety of Life at Sea, 1974 (SOLAS 74). Specifically, Chapter V, Regulation 5 provides the current authority and requires that "during the whole of the ice season, the south eastern, southern and south western limits of the regions of icebergs in the vicinity of the Grand Banks of Newfoundland shall be guarded for the purpose of informing passing ships of the extent of this dangerous region; for the study of ice conditions in general; and for the purpose of

affording assistance to ships and crews requiring aid within the limits of operation of the patrol ships."

SOLAS 74 also provides for distributing the cost of operating the Ice Patrol among those countries which benefit from the ice patrol service. Regulation 6 of Chapter V provides the authority for the United States to manage the ice patrol service and obtain reimbursement for operating costs. Specifically, "each Contracting Government specially interested undertakes to contribute annually to the expense of maintaining and operating these services a sum determined by the ratio which the total gross tonnage of that Contracting Government's vessels passing during the ice season through the regions of icebergs guarded by the Ice Patrol bears to the combined gross tonnage of the vessels of all contributing Governments passing through the regions of icebergs guarded by the Ice Patrol." Separate paragraphs of Regulation 6 include provisions for terminating participation or altering the provisions of Regulations 5 and 6 by the contributing governments, require a review of the arrangements relating to contributions to the cost of the services at intervals not exceeding three years with the managing Government (here the United States) initiating that review. Other regulations address speed near ice and routeing (which requires Contracting Governments to induce ships to avoid, as far as practicable, the fishing banks of Newfoundland north of latitude 43°N and to pass outside of regions known or believed to be endangered by ice.)

The specific cost allocation regime from paragraph (a) of Regulation 5 above is also included in the multilateral Agreement regarding financial support of the ice patrol titled "Safety of Life at Sea: Financial Support of the North Atlantic Ice Patrol" which entered into force on July 5, 1956 (TIAS 3597). This Agreement identifies the routes passing through the regions of icebergs. Specific routes include those routes

- between Atlantic Coast ports of Canada and ports of Europe, Asia, or Africa from the North Atlantic through or north of the Straits of Gibraltar,
- via Cape Race, Newfoundland between Atlantic Coast ports of Canada and west of Cape Race, Newfoundland and Atlantic Coast ports of Canada and north of Cape Race, Newfoundland,
- between Atlantic and Gulf Coast ports of the United States and ports of Europe, Asia, or Africa from the North Atlantic through or north of the Straits of Gibraltar, or
- via Cape Race, Newfoundland between Atlantic and Gulf Coast ports of the United States and Atlantic Coast ports of Canada and north of Cape Race, Newfoundland.

For purposes of calculating the tonnage in the cost allocation formula, the ice season is considered to be the period from February 15 through July 1 of each year. There is no specification on the period of time for which ice patrol costs are collected. Article 6 simply states that the "Government of the United States of America will furnish annually ... a statement of the cost of operating the Ice Patrol." The Agreement provides that if countries that are not a party to the financing Agreement are benefiting to an appreciable

degree from the services of the Ice Patrol, the United States Government shall inform the other parties and if there are no objections, extend an invitation to the benefiting non-party governments to accept the Agreement and share in the support of the Ice Patrol.

Section 738 of Title 46 United States Code provides the basic authority for the President to conclude international agreements for the conduct of an ice patrol and related issues. It authorizes the President to include in such agreements a provision for payment to the United States by the countries concerned of their proportionate share of the expense of the service, or for the United States to contribute its proportionate share should it be agreed that another country maintains the patrol.

BENEFITING TONNAGE AND COST SHARES

Benefiting Tonnage--All Governments.

Article 3 of the Agreement on "Financial Support of the North Atlantic Ice Patrol" identifies the routes for which the benefiting tonnage is computed as described above. The Agreement allows for exceptions when the actual routes pass below the Ice Patrol area. The tonnage data used to compute the proportionate shares is obtained from the United States Customs Service and from Canadian Customs. The tonnage data used is the total for all Canadian Atlantic Coast ports and all United States Atlantic and Gulf Coast ports. The presumption is that all tonnage to or from those ports used the North Atlantic shipping lanes though the Ice Patrol's area of responsibility.(Smith, 1995) Individual countries may then request tonnage exceptions by submitting a list of individual voyages that did not meet the criteria. Over the 1987-1992 period, the average tonnage computed during the February 15 - July 1 period was 154,923,413 GRT, and the average exceptions was 4,902,659 GRT. The average benefiting tonnage was 150,020754 GRT. During this time period, a total of 96 countries benefited from International Ice Patrol Services while a maximum of 20 countries had agreed to share the costs of the Ice Patrol.

Detailed tonnage and exception data are included in Appendix I for the 1987-1992 International Ice Patrol years. Data for 1993 and 1994 is not yet available. The Department of State contracts with the Bureau of Census to compile the data. The adjusted GRT for all benefiting countries are shown in Tables 1 and 2. The countries are listed by decreasing GRT for 1992. Table 1 contains those countries with more than 150,000 benefiting GRT in 1992. Table 2 contains those countries with less than 150,000 benefiting GRT in 1992. The total benefiting GRT for all countries is given at the bottom of Table 2. Throughout, there have been some changes in country names and allocations. For example, initially West Germany and East Germany were reported separately. Their shipping is now reported under Germany. There has been no attempt to reconcile these changes. The data included here are exactly as reported by the Bureau of the Census and used by the Department of State. The adjusted GRT data and the corresponding proportions are also included in Appendix II.

The entries in Tables 1 and 2 which correspond to countries who were/are parties to the financing Agreement are indicated in boldface. Note that Liberia withdrew from the Agreement after the 1990 season, reducing the number of participating governments from 20 to 19.

Total all governments	139,837,546	153,608,227	150,261,988	157,115,873	154,545,975	144,754,915
% by Contributing	59.0%	69.0%	67.1%	69.6%	56.4%	53.1%

Table 3 clearly indicates the impact of Liberia's withdrawal from the Agreement. With an adjusted tonnage over 20 million GRT, Liberia alone represents approximately 13% of the total benefiting tonnage. The final comparison in Table 3 illustrates the impact of the non-contributing governments. With Liberia's withdrawal, the remaining 19 countries represent 53% of the total benefiting tonnage in 1992. Almost half of the benefiting tonnage is not contributing to the support of the International Ice Patrol.

Cost Shares for Contributing Governments.

The benefiting GRT for the contributing governments and the corresponding proportionate shares are included in Appendix III. The total costs provided by the United States Coast Guard for the operation of the International Ice Patrol are included in Table 4. Note that the total costs increased significantly for the 1991 and 1992 seasons due to the heavy ice years and the increased length of the season. The proportions in Appendix

III are applied to the total costs to obtain the cost share for each government. The resulting cost shares are included in Table 4. In addition to the longer ice season, cost shares have also increased between 1990 and 1991 due to the withdrawal of Liberia. The cost shares for 1992 are further displayed in Figure 2. Five countries (Norway, Greece, United States, Panama, and United Kingdom) have cost shares covering 67% of the cost of operation of the International Ice Patrol

Table 4. Proportionate Cost Shares for Contributing Governments, 1987-1992.

COST REIMBURSEMENT

Procedures.

The Coast Guard typically provides a cost breakdown for the International Ice Patrol to the Department of State in the December-January time frame immediately following the ice season. The Coast Guard costs are provided to the Bureau of the Census for allocation by contributing government based on benefiting tonnage. The tonnage data has a much greater lag time, requiring input from both United States and Canadian Customs. In addition, there is an exchange of data with the contributing governments to provide an opportunity for them to identify exceptions. As indicated above, over four percent of the recorded tonnage is in the exception category. Using the recorded tonnage and exceptions approved by the Department of State, the Bureau of the Census computes the proportionate shares for the contributing governments and then computes the respective cost shares as above. The complete analysis is provided to the

Department of State. To illustrate the scope of the delay, the 1992 tonnage data was provided to Department of State in January, 1995, and the 1991 tonnage data was provided in April, 1994. The 1987 and 1988 data were provided in March, 1989 and March 1990, respectively. It appears that the data processing has improved significantly and that the 1993 data is nearly ready.

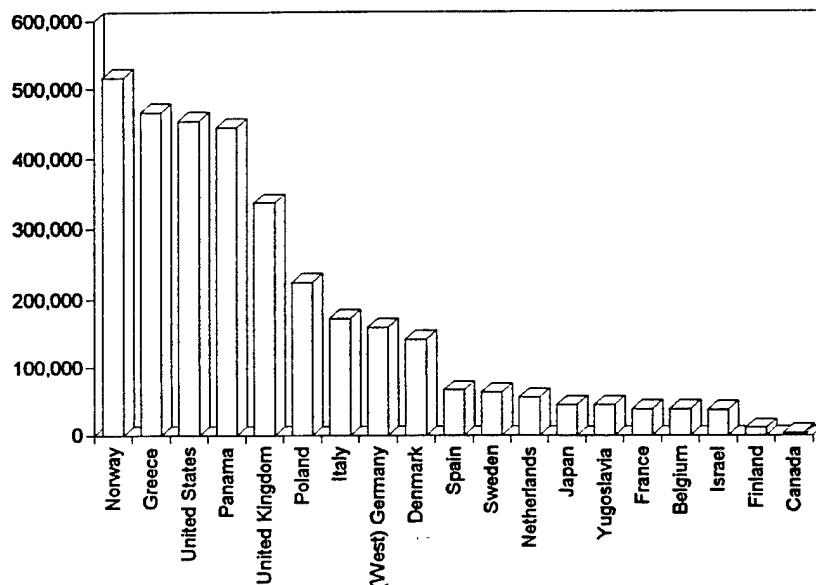

Figure 2. Cost Shares for Contributing Governments, 1992.

When the Office of Maritime and Land Support in the Department of State receives these data, the proportionate cost shares are included in a diplomatic note to the contributing governments. In most cases, the governments receiving these cost assessments include them in their next budget. Not only is there a significant delay in "billing" the beneficiaries, but there is an additional delay associated with the budgeting required in the several countries before payment can be made. Because of this budgeting process, it is important that the payment/billing backlog be managed so that the expected payment is not overwhelming for the contributing governments. Both the 1991 and the 1992 bills have been distributed during the past year. It is not clear what strategy should be followed if the 1993 bills can be ready very soon.

Reimbursement System Effectiveness.

Under current operating procedures, reimbursement amounts under this Agreement are credited directly to the U.S. Treasury and not returned to the Coast Guard to offset the operating expenses. There have been differing opinions within the Coast Guard with regard to the successfulness of the reimbursement system because there was no direct accounting to the Coast Guard. Table 5 summarizes the status of reimbursements in the 1985-1992 period showing the amount billed and the percentage

compliance. Appendix IV contains similar data for the entire period from 1977-1992 and includes amounts billed, amounts paid, amounts due, and payment compliance.

In reviewing the Table 5 data, note that the 1991 and 1992 bills have only recently been distributed, and both the 1990 and 1991 bills have been adjusted to account for a

computational error. Overall, most of the countries provide complete and timely payment. For the five year period from 1985 through 1989, the following countries paid 100% of their assessment: Belgium, Denmark, Finland, Germany, Greece, Japan, Netherlands, Norway, Sweden, and the United Kingdom. Of the remaining countries, Canada, Italy, Poland, and Spain have missed one year's assessment. During this period, France missed two payments, but has paid for 1991. Except for 1991, Israel has not made any payments since 1982. However, Israel has recently agreed to make payment for all outstanding assessments (Smith, 1995). Beginning with the 1987 assessment, Liberia has not made any payments. In 1991, Liberia formally withdrew from the financing Agreement. Yugoslavia, like Liberia has experienced significant political turmoil. Payments have not been made for the 1988 ice season and beyond. It is not clear which state is the successor state. Panama's payment compliance record has been mixed. On the average, Panama appears to be paying about two-thirds of the assessed amount.

The totals billed and collected and the impact on the cost recovery by the United States is partly illustrated in Table 6.

Table 6. IIP Cost Reimbursement Summary, 1985-1992.

	1992	1991	1990	1989	1988	1987	1986	1985
Total Billed	3,318,794	3,302,200	1,682,110	2,209,400	1,850,900	1,738,600	1,448,400	2,480,101
Total Collected	791,497	2,227,593	1,178,764	1,470,843	1,140,986	1,358,351	844,110	2,056,668
IIP Cost	3,318,800	3,302,200	1,682,100	2,209,300	1,850,900	1,738,600	1,448,400	2,480,101
US Share	454,791	541,057	205,261	254,314	171,278	169,950	106,038	202,156
US Paid	2,982,094	1,565,664	708,597	992,770	881,192	550,199	710,328	625,569

Clearly, Table 6 indicates that the United States has had to pay significantly much more than its share. Again, we must exclude 1990-1992 in this comparison because most payments have not been made and some data is incomplete. In 1987-1989, the largest source of non-payment was Liberia. In addition, Panama's partial payments in those years has not been completed and a significant balance remains. In 1988, non-payment by France, Italy, Spain, and Yugoslavia led to a significant shortfall. In 1987, Panama's partial payment was the major factor in the cost reimbursement shortfall.

With Liberia's withdrawal, the cost attributed to Liberia's tonnage will be proportionately distributed to the other contributing nations. Until the political situation in Yugoslavia is resolved, it is unlikely that any of that country's cost share will be recovered. It is not known why Panama is not making full payments. With Israel's agreement to provide reimbursement, it appears that the prospects are good for sustaining a relatively high percentage compliance with cost reimbursement. For example, using 1989 data, excluding Liberia, and considering non-payment by Yugoslavia and 27% of Panama, the cost reimbursement would be almost 94% (including the United States share). The unrecovered portion would be approximately \$108,000. Note that Table 6 indicates actual reimbursement to be lower because some governments have not yet submitted their payments.

Non-participating Government Cost Impact.

The provisions of the financing Agreement require the managing government to notify the other parties when non-participating countries are benefiting appreciably from the services of the Ice Patrol. Table 7 lists those non-participating countries with over 1,000,000 GRT of benefiting tonnage in 1992.

Table 7. Tonnage of Largest Non-Participating Governments, 1987-1992.

Country	1987	1988	1989	1990	1991	1992
	Adj GRT					
Liberia	6,634,118	24,947,411	22,339,285	22,519,237	18,189,705	20,143,400
Bahamas	4,863,223	6,630,959	7,459,173	7,986,083	9,317,399	9,565,175
Cyprus	5,062,946	9,274,181	10,027,454	8,713,333	9,548,185	9,492,160
Malta	531,454	1,184,029	1,032,969	1,834,618	2,665,984	5,815,641
Singapore	4,287,095	3,379,292	3,871,068	3,300,297	2,471,183	3,422,174
Russia						2,894,191
Philippines	4,096,745	4,932,890	4,168,884	3,603,125	2,727,651	2,042,407
Turkey	1,886,541	1,576,613	1,568,097	2,613,016	2,542,398	1,952,405
Taiwan	2,212,739	1,313,233	1,866,328	2,146,787	2,325,309	1,928,411
India	1,669,816	1,546,457	2,002,574	2,047,332	1,202,225	1,402,124
Algeria	229,896	565,578	1,573,496	2,020,784	1,741,529	1,385,153
Korea (South)	25,453	781,217	684,835	708,233	769,285	1,088,783
Luxembourg					224,758	1,071,710

Excluding Liberia, the additional tonnage is 42,060,334 GRT from 12 additional governments. Adding those governments to the agreement would result in the 1992 costs to the existing signatory governments to be less than 65% of the billed costs. Including Liberia would reduce the cost to 55% of the billed costs. Not having the other benefiting governments supporting the Agreement results in individual contributing government costs being 154% to 180% of what they would be if the governments in Table 7 were participating in the support of the IIP. The governments that are signatory to the financing Agreement and are paying their bills are providing a substantial subsidy to the non-participant governments.

SUMMARY AND CONCLUSIONS

The Department of State manages the International Ice Patrol cost reimbursement program using operating cost data provided by the United States Coast Guard and shipping tonnage data provided by United States Customs and Canadian Customs to compute the proportionate cost share for each government. Costs are charged to the home state of the vessels benefiting from the Ice Patrol Service. In 1992, the total United States Coast Guard cost of conducting the International Ice Patrol was \$3,318,800. The United States share was \$454,791.

At present, a total of 19 governments are signatories to the financing Agreement. These 19 governments comprise about 53% of the total tonnage shipped through the Ice Patrol area. Although the payment record is somewhat mixed, recent data (1985-1989) indicate that 90-95% of the billed costs should be recovered by the United States Treasury. Actual recovery has been less, depending on the year and political circumstances. For example, actual recovery in 1989 was 68%.

The 19 signatory nations comprise about 53% of the total benefiting tonnage. Thirteen additional countries that are non-participating, with over 1,000,000 GRT of tonnage each, could significantly reduce the individual country cost shares if they would provide financial support for the International Ice Patrol. This impact should be discussed at the triennial review of the financing Agreement scheduled for 1995.
